

Panel Discussion on Women and Mathematics

Carme Calderer (University of Minnesota) - Moderator

Women as well as various ethnic groups are significantly underrepresented in mathematical careers, and this situation varies greatly from country to country and in the different stages of mathematical education and careers.

In this panel we will discuss the current situation with a goal of identifying and promulgating practices and programs that have proved successful.

Speakers:

Carme Calderer (Moderator, University of Minnesota)

Patricia Bauman (Purdue University)

Margaret Beck (Boston University)

Rosa Donat (Universitat de València)

Irene Gamba (University of Texas at Austin)

Daniel Phillips (Purdue University)

Tere Seara (Universitat Politècnica de Catalunya)

Maria Schonbek (University of California at Santa Cruz)

Noel Walkington (Carnegie-Mellon University)
